A screenshot of a Kali Linux desktop environment. The window title is "kali-linux-2021 2". The taskbar shows several open applications: Burp Suite, a terminal window with "403 Forbidden" error, and a file manager. The active window is a text editor titled "~/.Downloads/package.json.bak%00.md - Mousepad". It displays the content of a JSON file, which is a package.json for a project named "juice-shop". The JSON includes version "6.2.0-SNAPSHOT", a description "An intentionally insecure JavaScript Web Application", a homepage "http://owasp-juice.shop", an author "Björn Kimminich", and a list of contributors. The keywords list includes "web security", "web application security", "webappsec", "owasp", "pentest", "pentesting", "security", and "vulnerable".

```
